Methow Airport Layout Plan

The Washington State Department of Transportation (WSDOT) Aviation is developing an updated Airport Layout Plan (ALP) and Narrative Report for the Methow Valley State Airport (S52), located in Winthrop, Washington. Methow's previous ALP was completed in 1995.

WSDOT is conducting the project in cooperation with the Federal Aviation Administration (FAA), Seattle Airports District Office.

Methow's updated ALP will define the short-term and long-term needs of the airport through a comprehensive evaluation of airport conditions and FAA design standards. The ALP will provide specific guidance in making necessary improvements to maintain a safe and efficient airport that is economically, environmentally, and socially sustainable.

We want to hear from you! Please provide comments on the following aspects of the Preliminary Preferred Alternative presented. This from can be:

- Mailed to: WSDOT Aviation, PO Box 3367, Arlington, WA 98223
- Faxed to: (360) 651-6319
- Emailed to: johnsel@wsdot.wa.gov
