## Introduction

The Washington State Speed Report is primarily intended to provide reliable speed data to be used in highway design, speed trend analysis, and collision analysis. The collection method records all vehicles passing over the loop detectors and consists of vehicle volume, classification and speeds. Speed data is collected and reported in five mile per hour increments with speeds ranging from 0 to 95 miles per hour. Due to equipment limitations we are excluding any vehicles traveling greater than 95 miles per hour.

### Quarterly Report by Calendar Year

1st Quarter is January - March

2nd Quarter is April - June

3rd Quarter is July - September

4th Quarter is October - December

### Glossary

85th Percentile	The speed at which 85% of all vehicles travel when passing a given point on the road
Average Speed	The sum of speeds divided by the number of vehicles that were observed
Calendar Year	January 1 through December 31
Data Status	Partial - some data is missing
PTR	Permanent Traffic Recorder - collects, speed, classification, length and volume
WIM	Weigh In Motion - collects speed, classification, volume, length and weights
SAMPLE	1 & 2=JAN, 3&4=FEB, 5&6=MAR

### Report Links and Formats
